

500 CFM WITH 50% LONGER HEPA FILTER LIFE

Phoenix Guardian R - Air Scrubber

MOST PORTABLE HEPA SYSTEM ON THE MARKET

The Phoenix Guardian R HEPA System is the most compact, portable True HEPA air filtration device made. Its energy-efficient rotomold design is durable, lightweight and stackable, making it the ultimate in both portability and performance.

Whether set-up as an air scrubber or negative air machine, the Phoenix Guardian R HEPA System design has been independently tested to verify True HEPA performance of not just the filter but of the entire device while delivering over 500 CFM of filtered airflow. With variable speed control, the Guardian R delivers just the right amount of desired airflow. The efficiency doesn't end with the filter performance and airflow; the Guardian R draws less than 2.5 amps of power. This makes the Guardian R HEPA System perfect for a variety of remediation projects where space and power are at a premium. A single Guardian R will provide 4 air changes per hour (the recommended minimum) on 7500 cubic feet (more than a 30' x 30' x 8' room).

FEATURES

- Up to 500 CFM airflow; 2.4 amps
- Compact design
- Variable speed flow
- Multiple ducting options
- Tough, rotomold cabinet
- Optional carbon/potassium permanganate blend filter
- On-board duplex GFCI and circuit breaker
- Large horizontal inlet maximizes capture zone
- 30% more filter media maximizes filter life
- True HEPA filtration with 2-stage filtration design
