

PATENTED, PORTABLE, POWERFUL

Phoenix Hydro-X - Vacuum Pac

PORTABLE TRUCKMOUNT PERFORMANCE

The Phoenix Hydro-X Vacuum Pac outperforms the competition by its ability to apply all of its suction power at the source, pulling more water than any other restoration extraction vacuum tool on the market today.

The Vacuum Pac, with its patented, portable design and high-end technology, has two powerful vacuum motors that can generate maximum suction. And because it is portable, the Vacuum Pac can be hand-carried anywhere in a structure. Truckmount units must stay outside the structure, and every foot of hose deducts 1 cfm of vacuum power. When combined with the Hydro-X Xtractor, the Vac Pac can apply all of its suction power right at the source of the water, losing no cfm unlike a truckmount that may use 24, 50 or 100 ft. of hose.

FEATURES

- Portable—applies all of its suction power at the source
- Rust and corrosion resistant stainless steel construction
- Built to withstand daily use
- Heavy duty electricals
- One year warranty on parts and labor
- Can be used separately from the Hydro-X Xtreme Xtractor
- Full stainless steel chassis
- Industrial vacuum and water pump
- Optional port for other vacuum needs
- Dual vac motors
