

PATENTED TECHNOLOGY STILL NO. 1

Phoenix Hydro-X - Xtreme Xtractor

SUPERIOR WATER EXTRACTION TOOL

The Phoenix Hydro-X Xtractor is the most effective and efficient extraction tool on the market today. The Hydro-X Xtractor's patented Suction Roller provides both suction and compression — forcing water to the surface then sucking the water away, not allowing the water to be reabsorbed back into the carpet and pad. No other extractor today can pull as much water from the carpet and pad as the Hydro-X Xtractor.

The Hydro-X Xtractor is steerable and self-propelled with variable speeds. One restoration technician can operate the unit and extract a 1200 sq. ft. structure with carpet and pad in under 2 hours!

FEATURES

- Patented suction roller
- Self-propelled with positive chain drive – no belts to break or adjust
- Variable speed for every carpet and pad condition
- Extracts in both forward and reverse
- Rust and corrosion resistant stainless steel construction
- Built to withstand daily use
- Heavy duty electricals
- One year warranty on parts and labor

PATENTED TECHNOLOGY STILL NO. 1

Phoenix Hydro-X - Xtreme Xtractor

SPECIFICATIONS

PART NUMBER

4025600

POWER

Current Draw: 2.5 Amps
Voltage: 120 VAC, Grounded

SPEED

0-28 FPM
Either forward or reverse

DIMENSIONS

	UNIT	SHIPPING
WIDTH:	17" (Base)	27.5"
HEIGHT	52"	45.5"
DEPTH:	20.5" (Base)	22"
WEIGHT:	70 lbs	80 lbs

Insurance companies recognize the Hydro-X as the best tool on the market and allow for "special extraction tool" rates, sometimes up to three times higher rates per sq. ft. than regular extraction tools. The Society for Cleaning Restoration Technicians, formerly ISCT, performed a market study of extraction devices at Shaw Industries. The results from that testing can be seen in the published report from www.isct.com. In that independent study of restoration professionals, the Hydro-X Xtractor with the Hydro-X Vac Pac pulled more water out of the carpet and pad than any other product on the market today, in one case pulling 40 gallons (or 320 pints) more water out of the structure than the next best tool.
