Fiberlock TECHNOLOGIES

Professional Products, Professional Results

THE SMARTEST SOLUTION IN MOLD RESISTANT COATINGS.

The best just got better. New and improved IAQ 6000 is a sustainable, white/tintable mold resistant coating containing a fungistatic agent to resist mold growth on the dry coating surface. IAQ 6000 is preferred by restoration professionals and has received the highest scores possible in both ASTM G-21 and ASTM D-3273 mold resistance testing by independent laboratories.

- SUPERIOR MOLD INHIBITION ON THE DRY COATING SURFACE
- EXCEPTIONAL HIDE WITH ONE COAT COVERAGE
- SUSTAINABLE ACTIVE INGREDIENT
- ULTRA LOW VOC*

* 1.7 g/L (calculated as per EPA) / 6 g/L (calculated as per SCAQMD)

NEW 8360-5 IAQ6000 5 GALLON

- Yields better results with 1 coat than competing products achieve with 2 coats
- Proprietary and sustainable new zinc complex active ingredient
- Ideal for AIA/CSI 02 87 13 or 02 85 00 Mold Remediation
- For use on wood, plaster, wallboard, sheetrock, concrete, masonry, and primed metal
- Exceeds requirements of IICRC S520 for fire testing, permeability, VOCs, and resistance against mold regrowth
- 10 Year Warranty

SAVE MONEY!

Twice The Coverage = Half the Labor.

IAQ 6000 contains a more effective mold resisting active ingredient and more solids per volume than competing products. **One coat** of IAQ 6000 hides much better and is more effective against mold than two coats of the leading competitor.

COST/COVERAGE COMPARISON		FIBERLOCK IAQ 6000	LEADING BRAND
1st Coat	LABOR	$0.50 / Sq.ft.	$0.50 / Sq.ft.
	COATING	$0.26 / Sq.ft.	$0.17 / Sq.ft.
		$0.76 / Sq.ft.	$0.67 / Sq.ft.
2nd Coat	LABOR		$0.50 / Sq.ft.
	COATING		$0.17 / Sq.ft.
			$0.67 / Sq.ft.
	TOTAL	$0.76 / Sq.ft.	$1.34 / Sq.ft.

IAQ SAVINGS: 43% / Sq.ft.

Labor is the most expensive part of restoration projects. IAQ 6000 acheives superior performance in a single coat saving in excess of 23% in material cost per square foot, with a 50% reduction in labor.

- 60% Labor is the largest expense when it comes to commercial restoration projects
- 30% Building Materials (wood, plaster, wallboard, sheetrock, etc.) make up another large portion
- 10% Coatings are actually a small portion of commercial restoration project expenses.

IAQ 6000 may cost more up front, but it can help avoid costly call backs. The use of lower quality coatings that fail to prevent bacterial re-growth can lead to a complete tear out/reconstruction incurring massive labor and material expenses.
